# 70 YEARS PROTECTING OUR SEAS

## WHO WE ARE

We are the leading Greek company in the field of port reception facilities, marine environmental protection services and waste management services.

Since 1940 we serve on a 24/7 basis more than 30 ports in Greece.

We provide immediate, effective & efficient solutions & services, concerning Emergency Response, globally.

We emphasize on the importance of recycling, valorization and alternative management of waste and strive for providing the most optimal and environmental sound solutions.

We protect sea and land from environmental hazards.

## OUR APPROACH

We combine cumulative **knowledge & experience** to deliver first-class solutions for our customers.

We are using all the **necessary resources** in a **sustainable way**, in order to tackle every environmental challenge.

We aim for our business to **positively influence** society and the environment.

We always aim at zero carbon dioxide emissions and we have achieved a **Zero Carbon Footprint**.

The adoption of **Circular Economy** concepts & practices is the way we do business.

## PORT RECEPTION FACILITIES

Our company provides Port Reception Facility services for Ship-Generated Waste, Cargo Residues (MARPOL73/78, Annexes I, II, V), as well as Ship Repair Waste Management sediments from shipyards, repair zones, anchorage etc. We also undertake the management of waste produced in ports, harbors, marinas and offshore installations.

We serve the largest Greek ports and numerous private facilities all over Greece, and our in depth experience combined with the qualified and trained personnel, guarantee the quality of our services.

At Antipollution S.A. we are fully licensed and we implement high end environmental practices for waste management, always based on Circular Economy and a Zero Waste approach.

Our clients receive all the necessary documents according to the relevant environmental legislation, after each visit and disposal of waste.

# AT A GLANCE

Concerning Port Reception Facilities of ship generated waste, ship repairs waste and cargo residues we offer:

1. Collection on land by using specialized equipment

2. Collection at sea by dedicated vessels
